

Audit of Risk Assessments

Fraserburgh South Park Nursery

January 2023

Audit of Benefit Risk Assessments

At South Park Nursery risk assessments will be formally reviewed and updated on a yearly basis, this is currently January of each year.

All risk assessments are reviewed and modified immediately, when necessary or when required, for example if an item is added to the outdoor area, that presents a risk, the risk assessment for outdoors will reflect this.

All staff contribute to the benefit risk assessments in the nursery and can adapt these to suit the ever-changing environment.

Staff have an excellent level of understanding of the differences between hazards and risks and are continually assessing risk within their day-to-day professional practice.

The benefits of children assessing risk and taking part in risky play are a large part of our values at Fraserburgh South Park Nursery.
